This sounds like a great idea. But I would like all of us to come together and plan this event. I'm still waiting to hear from the rest of the people on this email. Please let me know if you are available for a conference call on next Tuesday or Wednesday.

Subject: RE: East Chicago Community Outreach

Nice to meet you Janet. I too share your concern. I hope you do not mind, I have copied our HealthLinc team- Brandi Anstine- HealthLinc Chief Branding officer and she worked with HUD two years ago where we went to the West Calumet and had a block party and did lead testing
 Melissa Mitchell-HL Chief Operating Officer
 Dr Carl Toren – HL Chief Medical Officer
 Lilia Bonilla, Nurse Practitioner and HL East Chicago medical director
 Vanessa Fernandez- EC Site Manager

Would it make sense for us to take our model medical/dental van up and down the street with *some kind of way food*(ice cream truck?) to get them to come out and hear about

1. Lead testing-and maybe get tested
2. Lead remediation program the state does

We have found when we take services to the residents it works a little better...

Just an idea...I am sure the rest of the group had other ideas...

HealthLinc is in on a call...

Beth

Subject: East Chicago Community Outreach

Hi All,

My name is Janet Pope, I work for the USEPA, and I'm the community involvement coordinator for the USS Lead Site in East Chicago, IN.

There's something here that's really bothering me.

We have come across many residents in zone 2 that have a bunch of children in the home. These properties have been tested and are coming back with high lead levels. We ask parents if they have had their children blood tested. They answer no. We give them the information regarding the ECHD blood testing program. When we go back to the house to clean the soil, we ask the parents after the cleanup if they got the children's blood tested. We get answers like "there is nothing wrong with them" "I was gonna do it" "haven't had time" "to just no". I and others have seen these children playing in the dirt with their shoes off, and just covered in the dirt from head to toe.

It's evident to me at least they are not going to call the ECHD for testing. Therefore I would like to set up a conference call with everyone that's on this email to ask:

- 1) Would you be available for September 27th, 28th, and 29th to do blood testing for residents that live in the superfund zones here at Carrie Gosch School?
- 2) If Paul Krievins from, ISDH, would be available to come on the 29th to share resources for lead-based paint for the residents? This is another concern of the residents.

This would just be an information session for 3 days, with Paul giving residents resources for lead based paint (this may be in the auditorium) on that Saturday morning. If we do blood testing we can get two classrooms for that, and we also would like to have tables with additional information. (nutrition, health, etc). I know we have reach out to this community plenty of times, but I'm asking that we reach out one more time this year.

I would like to set up a conference call with all of you either Tuesday or Wednesday next week, please let me know by replying to this email if you are available. Just need to know now if you are available any of these days.
